Debbie,

Thanks for the quick response. As noted, we will include these revised boring logs in the Site Investigation and CSM Report due next year.

Also, John Andrade has made contact with the RR and we are in the process of completing the Environmental Right of Entry Application Form in order to gain access to MWs 54, 56 and 58 for PFAS sampling. We expect to submit the Application soon and hopefully have access to sample these wells in January 2020.

Have a safe day.

Regards,

Marty

Marty,

Revised boring logs with well construction details may be submitted in the Final Report.

Thanks.

Debbie

Debbie,

The boring logs were prepared by and provided to us by RAI, as they were overseeing the drilling operation. In reviewing the boring logs, information regarding well completion is provided on the header of each boring log but not included on the side of the boring log. In order to provide a complete boring log, I will send a note to RAI (Rolf) and have them update the actual boring log with the completion information. If acceptable to you, I would like to suggest that we include the revised boring logs in the Final Report that is planned for submittal in July 2020.

Once you have reviewed this response, please let me know if this an acceptable approach.

Have a nice weekend.

Marty

Martin,

Monitoring well construction details are not provided in Appendix A (Boring Logs / Monitoring Well Construction Diagrams). Are you planning to include these in the Final Report which is due in July?

**Subject:** Army Creek Landfill - DRAFT First Quarterly Event and Well Installation Report

Debra,

On behalf of Army Creek Private Settlers and New Castle County, EHS Support is submitting this Draft First Quarterly Event and Well Installation Report for your review. Due to the size of the file, the link provided below can be used to access the draft report. Also, we will be providing bound copies of the draft report to USEPA and DNREC in the mail. We apologize for the minor delay submitting this report to you.

Once you have had an opportunity to review the draft report, please do not hesitate to contact me.

As we have advised all parties, the October groundwater sampling event will begin on Wednesday October 9 and continue into the week of October 14, 2019.

Regards,

Marty
